Summary

Technical Artist and **Tools Programmer** specializing in **workflow automation**, **pipeline development**, and **scalable content** production systems. Experienced in Unity Editor tooling, Photoshop automation (UXP & ExtendScript), Python pipelines, AI-assisted workflows, and gameplay systems. Built **automation solutions** across multiple production ecosystems, reducing repetitive artist operations and improving content scalability. **Developed 20+ games** and received **multiple national game development awards**.

Skills

Programming	Softwares	Technical Art	Pipeline & Tools	Version Control
- C# - C++ - Python - Javascript - Lua	- Unity - Unreal Engine - Photoshop - After-Effects - Overdare - Cocos Builder	- Photoshop UXP - ExtendScript - Shader Graph - VFX - Asset Pipeline	- Unity Editor Tooling - Workflow Automation - Asset Processing - External Data Integration - AI-Assisted Automation	- Git - Plastic CSM

Experience

Electronic Arts Hyderabad, IN Technical Artist Intern 01/2026 - 07/2026	- Developed 10+ production automation initiatives across Unity, Photoshop, Python, and AI-assisted workflows. - Built Unity Editor tools for automated asset import, validation, and prefab generation, significantly reducing manual setup time. - Created Photoshop automation tools using ExtendScript and UXP, reducing repetitive artist operations and standardizing production workflows. - Designed Google Sheets-driven production pipelines for automated asset configuration and synchronization. - Prototyped AI-assisted image enhancement, segmentation, and background removal workflows for production evaluation. - Collaborated with artists, producers, and stakeholders to identify bottlenecks and improve content scalability. - Built production-ready automation tools used across multiple artist workflows, focusing on scalable content pipelines and workflow consistency.
Overdare - Krafton Remote (South Korea) Game Developer (Contract) 08/2025 - 12/2025	- Built and shipped the full game Bomb Mayhem! from scratch on Overdare's proprietary UGC engine. - Designed and implemented gameplay systems, levels and content in Lua within engine constraints. - Adapted quickly to a new, UGC-first toolset and workflow for the platform. - Collaborated closely with the team to prototype, iterate and polish for replayability. - Runner-up at the Overdare Game Jam 2025 for fun, replayable gameplay.
Secernate Games Chennai, IN Technical Artist 11/2024 - 07/2025	- Collaborated with designers to create visual assets for game environments. - Assisted in optimizing 3D models for performance and memory usage. - Participated in team meetings to discuss project progress and feedback. - Researched current trends in gaming technology to inform design decisions. - Developed custom visual effects in Unreal Engine 4. - Worked as an Environment Artist to make the level visually accurate, as needed.
Rezo-VR Jalandhar, IN VR Game Developer Intern 01/2023 - 07/2023	- Developed engaging gameplay mechanics for virtual reality experiences. - Implemented user interface designs to enhance player interaction. - Utilized Unity for game development projects. - Participated in team meetings to brainstorm innovative game ideas. - Prototyped game mechanics and core gameplay systems for multiple mobile systems. - Engineered all enemy systems within the game.

Education

Artemisia College of Art And Design | Indore, MP
Bachelor of Design (Game Design)
08/2022 - 05/2026

Highlighted Projects

Squeak Off! 3D Action-Cozy Shooter. - Designed Gameplay Systems. - Developed AI and combat mechanics. - Selected among Indie 40 Showcase titles at IGDC 2025.	Entwined Reimagined - Top 10 Finalist – WAVES India 2025. - Team-based game development. - Gameplay and systems implementation.	Bean 'em All 2D Action Rogue Like. - Impactful and Heavy Gameplay Feedback. - Handled the System Design and Flow Setup.
